About me

With over 4 years of experience as a Frontend Developer Contractor, I have honed my skills in a diverse array of technologies and tools, including React, TypeScript, Apollo GraphQL, Jest, Material-UI, Styled CSS, Storybook, Yup, Jotai, and JSON-Forms. My journey in the tech industry spans over a decade, marked by a passion for crafting seamless, visually appealing, and user-centric digital products. This journey encompasses not only my current expertise in frontend development but also a 5-year tenure in a Project Manager role, bringing my total tech experience to over 10 years with a focus on design and web technologies.

In my quest for new opportunities, I aim to leverage my professional and technical skills to find in a Frontend Developer position within an EU-based team.

As I continue to evolve in my IT adventure, I am eager to master git-CI, unit testing, and delve further into the modern capabilities of front-end CSS. My career thus far has been a testament to my ability to adapt, innovate, and lead in the ever-changing landscape of web technologies.

experience

- From
September
2022 to
February 2024

Frontend developer - Contractor
HGX Los Angeles - Remote
During the last 2-year I spent with [HGX.org](#), a fast-growing startup, I played a pivotal role as a Front-End Developer. I focused on refining React components and integrating ApolloGraphQL API, and Jest for robust testing, collaborating closely with the backend team to develop the dynamic app. My responsibilities extended to building numerous forms with Material-UI and Apollo GraphQL API, ensuring all components met rigorous testing standards. Additionally, I contributed to creating email layouts and marketing landing pages, effectively meeting the diverse needs of marketing.
- From August
2023 to
January 2024

Frontend Developer - Contractor
Yara International Singapore
This position allowed me to blend my technical skills with a strong sense of design, contributing to digital systems that were not only functional but also accessible and visually appealing.
 - Refactoring Design Components: I've refactored and improved existing design components, making sure they were effective and up to date.
 - Creating New Components: I developed new components to expand our design system's capabilities.
 - Code Review and Testing: I reviewed code and tested components across different browsers to ensure quality and reliability.
 - Bug Fixing: I provided fixes for any issues, keeping our system running smoothly.
 - Working with Designers: I frequently collaborated with the design team, discussing component designs.
 - Improving Documentation: For each component, we used Storybook documentation. I've developed a necessary demo and playgrounds for the users to get them to understand how the component works before using it.
- From
December 2021
to July 2022

Frontend developer
Cryptic Labs, Los Angeles Remote
I am responsible for the development of Landing pages and Web-apps on React from scratch, new layout development on Tailwindcss based on Figma design, and email HTML templates.
