## ABOUT ME

I'm Frontend Developer, working with React, TypeScript, Material-ui Tailwind, and Jotai. I am a skilled and result-oriented front-end developer dedicated to creating and optimizing interactive, userfriendly, and feature-rich websites.
I'm reliable and I pay attention to details with a passion to provide high-quality UI for the end users. I can concentrate on routine tasks and have a solid drive to improve my skills constantly.
And I looking for a Frontend Developer position in an EU-based team that will use my professional and technical skills.
3-year commercial experience in a Frontend position.
5-year commercial experience in a Project Manager role.
Total 10+ years of various tech experience, with a focus on design and web technologies.

## EXPERIENCE

### Frontend developer - Contractor

HCX - Los Angeles - Remote - From September 2022 to February 2024

During the last 2-year I spent with [HCX.org](HCX.org), a fast-growing startup, I played a pivotal role as a Front-End Developer. I focused on refining React components and integrating ApolloGraphQl API, and Jest for robust testing, collaborating closely with the backend team to develop the dynamic app. My responsibilities extended to building numerous forms with Material-UI and Apollo GraphQL API, ensuring all components met rigorous testing standards. Additionally, I contributed to creating email layouts and marketing landing pages, effectively meeting the diverse needs of marketing.

### Frontend Developer - Contractor

Yara International - Singapore - From August 2023 to January 2024

This position allowed me to blend my technical skills with a strong sense of design, contributing to digital systems that were not only functional but also accessible and visually appealing.
- Refactoring Design Components: I've refactored and improved existing design components, making sure they were effective and up to date.
- Creating New Components: I developed new components to expand our design system's capabilities.
- Code Review and Testing: I reviewed code and tested components across different browsers to ensure quality and reliability.
- Bug Fixing: I provided fixes for any issues, keeping our system running smoothly.
- Working with Designers: I frequently collaborated with the design team, discussing component designs.
- Improving Documentation: For each component, we used Storybook documentation. I've developed a necessary demo and playgrounds for the users to get them to understand how the component works before using it.

### Frontend developer

Cryptic Labs, Los Angeles - Remote - From December 2021 to July 2022

I am responsible for the development of Landing pages and Web-apps on React from scratch, new layout development on Tailwindcss based on Figma design, and email HTML templates.
- Transferred MaterialUI concept into styled components application
- Migrated the web app from Redux, Redux-toolkit to MobX
- Implemented multi-site (multizone) experience (SSR and SPA) as one web app for developing both websites independently with the same level of control
- Added internationalization in the web app with i18n

### Freelance Javascript Developer React.JS & Node.JS

- Tenerife, Spain - Since January 2020
- Frontend with React/Redux
- RESTful API's Node.js and Express
- low-level CSS framework Tailwind
