Experience

From September 2022 to February 2024

Frontend developer - Contractor
HCX , Los Angeles - (Remote)

- Developed and implemented new features and components using React, enhancing user interface and experience.
- Engaged in debugging and collaborative problem-solving to improve API functionality and achieve app requirements.
- Initiated and maintained continuous collaboration with backend developers for API design discussions, facilitating faster feature implementation.
- Conducted code reviews and component testing to ensure compliance with Jira tasks and project requirements.
- Spearheaded the refactoring of components to align with Figma designs, ensuring high fidelity and consistency.
- Created multiple forms with React forms, JSONForms, and Yup-validation.
- Provided an integrating queries and mutations by Apollo GraphQL API for efficient data handling.
- Designed email layout templates and marketing landing pages using Next.js, meeting strategic business and marketing objectives.
- Ensured quality and reliability of components by implementing Jest unit tests and utilizing Cypress for end-to-end testing.

From August 2023 to January 2024

Frontend Developer - Contractor
Yara International , Singapore - (Remote)

- Revamped design components for enhanced functionality and aesthetics.
- Engineered new components, enriching the design system.
- Ensured cross-browser quality and reliability through code reviews and testing.
- Facilitated smooth design team collaboration, improving component documentation with Storybook. I've developed a necessary demo and playgrounds for the users to get them to understand how the component works before using it.
- Bug Fixing: I provided fixes for any issues, keeping our system running smoothly.
- Working with Designers: I frequently collaborated with the design team, discussing component designs.

From December 2021 to July 2022

Frontend developer
RNS.ID, Cryptic Labs , Los Angeles - (Remote)

- Spearheaded the development of React-based landing pages, web apps, and email HTML templates.
- Transferred MaterialUI concept into styled components application
- Migrated the web app from Redux, Redux-toolkit to MobX
- Implemented multi-site (multizone) experience (SSR and SPA) as one web app for developing both websites independently with the same level of control
- Added internationalization in the web app with i18n

2020

Freelance Javascript Developer (React.JS & Node.JS)
Kotkoa ,Tenerife, Spain

- Focused on React/Redux frontend and RESTful API development with Node.js/Express.
- Utilized Tailwind for streamlined CSS framework applications.
