

ANDRIY KOTKO

Senior Full-Stack Engineer · React · TypeScript · Node.js

Pego, Alicante, Spain ◇ +34 647 185 406 ◇ kotkoa@gmail.com ◇ linkedin.com/in/kotkoa ◇ github.com/Kotkoa

EU work authorization ◇ Remote EU ◇ On-site Valencia–Alicante ◇ US contractor

OBJECTIVE

Senior Full-Stack Engineer with 6+ years of commercial product delivery and a frontend-first focus on React, TypeScript, Next.js, and GraphQL. I own high-impact user-facing features end to end: complex UI states, real-time experiences, performance, testing, release, and the supporting APIs, data layer, and integrations when the product requires them.

SKILLS

Frontend	React, TypeScript, JavaScript ES6+, Next.js (App Router, SSR/SSG), Apollo Client, GraphQL, Jotai, MobX, Material-UI, Tailwind, SASS
UI Engineering	Design systems, Storybook, Radix UI, design tokens, accessibility (WCAG), i18n, responsive UI, real-time interfaces, web push (VAPID)
Backend & Data	Node.js, Deno (Supabase Edge Functions), PostgreSQL, Supabase (Auth, Realtime, RLS), REST, WebSocket/SSE, OAuth 2.0, webhooks
Quality & Delivery	Jest, Cypress, Playwright, React Testing Library, CI/CD, feature flags, Git, Nx monorepo, Vite
AI Development	OpenAI API, Pinecone/RAG, ElevenLabs React SDK, GitHub Copilot since 2023; daily agentic workflows since 2025 using Claude Code and OpenAI Codex
Languages	English (professional working), Spanish (conversational), Ukrainian (native), Russian (fluent)

EXPERIENCE

CloneForce <i>Full-Stack Engineer (Contract)</i>	Nov 2024 – Mar 2026 <i>Remote, USA</i>
- Owned the type-safe frontend data layer for 100+ GraphQL operations: GraphQL Codegen, Apollo cache policies, multi-tenant organization switching, and an Auth0 bridge in the Next.js App Router; led the Apollo Client 3 to 4 migration. - Built real-time AI interaction interfaces using GraphQL subscriptions over graphql-ws WebSocket and SSE, delivering streaming responses and conversational assistant experiences in the core web application. - Replaced the default ElevenLabs embed with a custom React voice-chat implementation; built OAuth 2.0 integration flows for Microsoft, Google, and HubSpot with server-side token exchange and per-tenant credential storage. - Improved page load time by 1.2s through code splitting, lazy loading, and Apollo cache tuning; maintained 50+ MUI-based UI components and Cypress E2E coverage for critical product flows.	
On the Beach (via Netguru) <i>Full-Stack Engineer (Contract)</i>	Apr 2025 – Oct 2025 <i>Remote, UK</i>
- Modernized the production booking flow to React 19 and Next.js 15, strengthening performance, maintainability, and the foundation for further platform delivery. - Led the Apollo Client 3 to 4 migration, improving GraphQL data management, cache stability, and frontend–backend integration in a large legacy codebase. - Rebuilt the Search Results experience and shipped controlled feature-flag rollouts, A/B experiments, UI toggles, and search-logic improvements across 3 concurrent experiments.	
Human Capital Exchange (HCX) <i>Full-Stack Engineer (Contract)</i>	Sep 2022 – Nov 2024 <i>Remote, USA</i>
- Built multi-role account onboarding with React, Apollo GraphQL, JSON Forms, and Yup validation; integrated DocuSign for in-app signing, KYC, and compliance workflows. - Re-architected the payments experience: removed 3 blockchain libraries and migrated the product to bank, card, and bank-account transactions, reducing settlement complexity. - Strengthened frontend quality delivery with Jest and Cypress CI/CD automation for critical user flows; consolidated Material-UI theme patterns and reusable UI styles across the platform.	
Yara International (via Bridge The Gap) <i>UI Engineer (Parallel Contract)</i>	Aug 2023 – Jan 2024 <i>Remote, Singapore</i>
- Delivered 10+ reusable React and React Native design-system components in an Nx monorepo, translating Figma designs into production-ready UI. - Migrated and restructured Storybook 7 documentation, improving the discoverability and adoption of the component library for web and mobile teams.	
Root Name System (RNS) <i>Frontend Engineer (Contract)</i>	Nov 2020 – Jun 2022 <i>Remote, Singapore</i>
Delivered 3 landing pages, 2 web applications, and 35 HTML email templates for a digital-identity platform; built product UI for digital ID verification and subscriptions.	

PROJECTS

EV Libre Full-Stack Engineer. Production React 19 + TypeScript PWA that tracks live EV charge-point availability across Spain’s Iberdrola network and sends web-push notifications when an occupied connector becomes available. Built solo: strict TypeScript UI, Supabase Realtime with polling fallback, magic-link auth, PostgreSQL, a Deno Edge Function ingest pipeline, Supabase cron, push alerts for Safari/PWA and Chrome.

EDUCATION

Bachelor – Instrument Engineering, Sevastopol State Technical University, Ukraine
